

CE

# ERD

## Valves Tester

- ✓ NEW COMPACT FORMAT (1/2 19")
- ✓ OPTIMISED MEASUREMENT
- ✓ EASY SET-UP
- ✓ HIGH SPECIFICATIONS - COMPETITIVELY PRICED

## 5 SERIES

### Main Features

*With an ERD you have several instrument in one.*

*It's an instrument designed to test components for which a response is expected at a given pressure.*

*The instrument applies a gradually increasing pressure to the test part, until the expected event occurs, producing an electrical contact closure.*

*It checks that the pressure is within the specified limits and releases the pressure. Its design allows it to be used for on-line testing of production parts.*

*It's also a flow tester.*

- Regulate up to 16 different pressures.
- Programmable rates or rise and fall.
- Adjustable reject levels.
- Serial links:  
RS232: printer, P.C. and parameter storage module.
- 16 programs
- 7 inputs / 5 outputs
- Times and date display, choice of languages and units, customisation of tests for your requirements, automatic measurement cycle...

### Applications

Relief valves, pressure switches, check valves, safety block...
